MEMORANDUM FOR THE FILE

E-X-T-R-A-C-T

"Future Bureau of Public Roads Land Usage Plan: Mr. Moreland of GSA is our contact point concerning the Blue Ribbon Panel deliberations on Federal lands disposition. The item under current consideration is the Bureau of Public Roads land adjoining the CIA site. It is up for consideration as a continuing BPR facility or turning it into a park. We have vested interests in this property in that we have usage permits for West Parking and the helicopter site and we have previously laid claim to the Scattergood-Thorne property adjoining our entrance way at Route 123. With Logistics we had worked up a usage plan which would preserve our holding at West Parking, the Scattergood-Thorne property and some additional land running out to 123. This would leave BPR as presently constituted or would leave the remaining property for park development should this be the need. Mr. Moreland had asked that we make known to him our proposed usage plan so that this could be considered in the committee deliberations. He needed to be advised as quickly as possible and accordingly I asked Mr. Blake to show him the plans that we had devised on an informal basis stating that they were subject to official approval within the Agency. However, with the exception of one small stretch of land all the property in question has been the subject of documentary exchanges of letters and memoranda affirming our continuing interest in this property. I will present for formal approval our usage plan when the ExDir returns from vacation."
